

AI Operational Audit: Complete Pilot Toolkit

Everything you need to execute the **14-Day Zero-Friction Pilot Program** — from kickoff to executive presentation. This toolkit contains all templates, agendas, and guides for your team.

14-DAY PROGRAM

ZERO-FRICTION GUARANTEE

What's Inside This Toolkit

Four core documents guide your team from initial kickoff through final executive presentation.

Day 1 — Kickoff Meeting Agenda

30-minute structured session to align stakeholders, define scope, and launch the pilot.

Day 2 — Non-Invasive Workflow Template

A structured form to capture up to three manual or disconnected processes without exposing sensitive data.

Day 3 — Clarification Call Guide

15-minute deep-dive to validate submitted workflows and sharpen financial modeling inputs.

Day 14 — Executive Presentation Outline

30-minute slide-by-slide framework for PE partners and portfolio company leadership.

Document 1: Day 1 Kickoff Meeting Agenda

Meeting Details

Duration: 30 Minutes

Participants:

- PE Sponsor
- Portfolio Company Lead
- Audit Team

Agenda at a Glance

- 1** — Welcome & Introductions — 5 min
Brief overview of the pilot goals and the zero-friction guarantee.
- 2** — Scope Definition — 10 min
Identify the target department (e.g., Customer Support, Finance, or Operations) and confirm key operational pain points.
- 3** — Data Gathering Process — 10 min
Walk through the Non-Invasive Workflow Template and establish the timeline for submission.
- 4** — Next Steps & Q&A — 5 min
Confirm the date for the brief clarification call.

Document 2: Day 2 Non-Invasive Workflow Template

Please describe **up to three repetitive, manual, or disconnected processes** within the target department. Do not include sensitive customer data, passwords, or direct system access.

📄 Complete one form per process. Aim for clarity over completeness — your audit team will follow up on Day 3.

1	Process Name Give the process a clear, descriptive title. <i>Example: Monthly Billing Reconciliation</i>
2	Step-by-Step Description Describe how the task is currently completed manually, from start to finish.
3	Estimated Time Spent How many hours per week or month does the team spend on this process?
4	Systems Involved List the software or tools used — e.g., Excel, Salesforce, internal database.
5	Current Bottlenecks Where does the process slow down or experience errors? Describe the friction points.

Why Non-Invasive Data Gathering Matters

The zero-friction guarantee means your team never needs to grant system access or share sensitive data. The workflow template is designed to surface operational insight through description alone.

No System Access Required

Describe processes in plain language — no credentials, no integrations needed during the pilot.

Minimal Time Investment

Each process form takes approximately 15–20 minutes to complete. Three forms total.

Maximum Analytical Value

Structured descriptions enable accurate financial modeling and automation opportunity scoring.

Document 3: Day 3 Clarification Call Guide

Call Details

Duration: 15 Minutes

Participants:

- Portfolio Company Lead
- Audit Team

This focused call ensures the audit team has everything needed to build an accurate financial model before analysis begins.

Discussion Points

1

Review of Submitted Workflows — 5 min

Confirm understanding of the steps described in the template. Clarify any ambiguous language or missing context.

2

Friction Point Deep-Dive — 5 min

Ask targeted questions to clarify manual handoffs or system disconnects. Identify where automation would have the highest impact.

3

Data Validation — 5 min

Verify the estimated time spent and volume of transactions to ensure accurate financial modeling and EBITDA projections.

The 14-Day Pilot Timeline

From kickoff to executive presentation, every step is structured to minimize disruption and maximize insight.

Kickoff

Day 1 meeting to align goals

Template Submit

Day 2 workflow template delivered

Clarification Call

Day 3 Q&A to refine details

Executive Demo

Day 14 presentation of findings

The compressed timeline is intentional — it demonstrates value quickly while respecting the operational bandwidth of your portfolio company team.

Document 4: Day 14 Executive Presentation Outline

Presentation Details

Duration: 30 Minutes

Participants:

- PE Partners
- Portfolio Company Leadership
- Audit Team

Purpose

The Day 14 presentation transforms 14 days of structured discovery into a clear, quantified business case for automation — ready for immediate decision-making by PE partners and portfolio leadership.

Slide-by-Slide Presentation Outline

A five-slide structure designed to move from insight to action in 30 minutes.

1

Slide 1: Executive Summary

The 14-day pilot journey and the target department analyzed.

2

Slide 2: Top 3 Automation Targets

Visual mapping of the identified manual bottlenecks.

3

Slide 3: Financial Impact & EBITDA Uplift

Quantified cost of inaction and projected valuation increase.

4

Slide 4: Phased Execution Roadmap

Low-risk, step-by-step implementation plan.

5

Slide 5: Next Steps & Engagement

How to transition from pilot to full implementation.

From Pilot to Full Implementation

The 14-Day Zero-Friction Pilot is designed as a launchpad — not a standalone exercise. Every document in this toolkit builds toward a single outcome: a clear, confident decision to move forward.

Identify

Surface the highest-impact automation opportunities through structured, non-invasive discovery.

Quantify

Translate operational friction into financial terms — EBITDA uplift, cost of inaction, and valuation impact.

Execute

Move from pilot findings to a phased, low-risk implementation roadmap with clear milestones.

Ready to begin? Use Document 1 to schedule your Day 1 Kickoff Meeting and start the clock on your 14-day pilot.
